## Graduate Geologists & Geophysicists

- **Dynamic Firm**
- **Brisbane Based**
- **Experienced & Supportive Team**

Our client is expanding rapidly and is seeking high quality geologists. This consulting firm has an excellent industry reputation and record of delivery. They are currently seeking geologists with previous experience and expertise in exploration geology, coal, petroleum and coal seam gas, and exploration to work in Australia and abroad.

An exciting opportunity exists for **Geologists/Geophysicists** and **Graduate/Post Geologists** to join a highly successful team in a dynamic Consultancy. Due to the nature of this industry, work in international locations is a definite possibility. Within one year, the successful applicant will have acquired technical knowledge that will be highly respected and sought after in this booming industry.

- Immediate start
- Diligent work practices and positive attitude toward safety is a must
- Will be required to work in a group and individually from time to time
- Position will answer directly to principal consultant or supervisor
- Supportive and multi-disciplinary team environment

Successful candidates will be degree qualified, be able to demonstrate superior communication and organisational skills and have a high level of computer literacy. A full C class driver's car licence is preferred.

Positions are Brisbane based and will require travel to exploration and mine sites as required. Benefits include a competitive salary and conditions, including relocation package and immediate superannuation coverage.
